Dear Hiring Manager,

I'm a Mechanical Engineering Penultimate year student with a strong foundation in mechanical engineering and hands-on experience in practical production and design, I believe I can contribute to your various multidisciplinary projects and further develop my professional expertise.

I believe my experience working on delivering an engineering product as part of a multidisciplinary team in Sydney Motorsports as well as my time as a CFD Intern for Dovetail Electric Aviation provides me with strong problem solving skills and hands-on experience in CAD, FEA, CFD as well as common manufacturing techniques will allow me to excel as part of the Northrop team. My key strengths include:

- **CFD and Thermal Analysis:** Experience in cooling duct as well as external aerodynamics simulation. I am also aware of and have conducted basic HVAC analysis for a restaurant environment using TRACE700 as well as fluent.
- **Mechanical Design and CAD:** I have extensive experience in SOLIDWORKS and Autodesk Inventor, with applications in aerodynamic structures construction and simulation, robotic systems and mechanical components.
- **Practical Engineering and Prototyping:** I have a strong foundation in composite manufacturing, mold fabrication and structural validation through numerical and physical testing.
- **Collaboration and Communication:** I have a proven ability to work in multidisciplinary teams, liaising with engineers, fabricators and non-engineering departments as the aerodynamic lead in Sydney Motorsports, which I believe will allow me to work well as part of your's team.

I am excited about the opportunity to join your company and be part of an impactful project. Thank you for your consideration and I look forward to the opportunity to discuss my abilities and its alignment with your vision.

Sincerely,
Winston Zhang
